

Since August 2019 we have been collecting data relative to our sustainability practices and we would like to share with you our footprint during this past years.

Every year we make new efforts to keep our practices the most sustainable as possible so we can all leave a better world for future generations.

Thank you for choosing to work with a family company that has these values and please do make any suggestions on what we could do to add other sustainable practices to our products and services.

WHITEMANS®
